

KTM SX-E 5

The KTM SX-E 5 is an all-electric mini-crosser aimed at both beginner and competitive junior riders. With zero emissions and minimal sound pollution, it takes its place at the leading edge of competitive mini-cross, and provides a real-world READY TO RACE alternative to the petrol-powered 50 cc engine. Featuring high-quality components that make it significantly different from the many electric mini-cycles available on the market, the KTM SX-E 5 is a fully-fledged competition motorcycle, making it more accessible to younger riders for use in areas where noise emissions are restricted.
